# Attachment 1 of 1 to CLM-2026-0010

## DOC-C010-01 | Provider Request for Additional Visits (submitted with CLM-2026-0010)

**Provider:** Clearwater Behavioral Health (synthetic) | **Date:** 2026-10-19
**Patient:** MBR-100093 (38-year-old male)

Session 13 of ongoing treatment for generalized anxiety disorder (F41.1), delivered by telehealth. GAD-7 score at intake in 2026-03: 17 (severe). Current GAD-7: 14 (moderate). Patient is improving but has not reached remission. A treatment plan with cognitive behavioral therapy goals is attached. Provider requests authorization for 8 additional sessions. Early discontinuation carries documented risk of relapse.
